NATIONAL EGG MARKET AT-A-GLANCE

In most areas, prices were higher on all sizes. The market tone was fully steady to firm entering the weekend. Demand was light to good, best where features were in progress or planned for next week. Supplies were occasionally short to adequate for trade needs. Breaking stock offerings were adequate for the moderate to good demand. Light type fowl were at least sufficient for less than normal processing schedules.

Effective January 2, 2002, the Prices to Retailers series covering cartoned eggs delivered into retailers' warehouses or directly to the retail outlet will be adjusted to reflect changes in pricing terms. Previously unidentified changes in some pricing terms were found during a review of current data collection and price reporting procedures. Market News will continue to monitor this egg price series and change prices as dictated by pricing procedures used by the egg industry. The prices reported do not reflect marketing allowances. As adjustments are made in individual reports comprising the Prices to Retailers series, the applicable report will include prices both with and without the adjustments on the day the adjustments are made. All affected reports will be adjusted by January 7.
